Education Services

Essential ICT Investments – Replacing Your SIMS Server

Here at BT Lancashire Education Services we know how important it is for you to keep your hardware operating smoothly to protect both your school's systems and the sensitive data they hold. This is particularly true for your hardware running SIMS.

BTLS Education Services offer a number of servers to suit your individual requirements, whatever the size and demands of your school. We recommend Peer-to-Peer servers are replaced every 3 years and domain servers every 5 years. So why not take a look and see if you find something that meets your needs.

If you can't find what you're looking for, or even if you're simply unsure what is the best option for your school, give our friendly team a call who'll be delighted to explore the alternatives available.

Optional Services

INSTALLATION SERVICES

In addition to supplying your new server, BT Lancashire Services offers a comprehensive installation service to get you up and running with minimal downtime. We can transfer all of your key services to your new server, including SIMS and critical data.

Our highly experienced, education focused team understand how to work with schools without disrupting the vital services which you provide to your local community.

For more information about our expert installation service please contact us.

P2P SIMS SERVERS

A direct replacement for your office SIMS server, this carefully specified workstation can support up to 5 users. To allow more users, or if you are interested in a more robust SIMS environment, please consider our range of domain servers.

Standard P2P Server
Intel Core i5 6th Gen Processor
8GB RAM
500GB HDD
3 Year On Site Next Business Day Warranty

Suitable for smaller Primary Schools

Enhanced P2P Server
Intel Core i7 6th Gen Processor
16GB RAM
256GB SSD
1TB HDD
3 Year On Site Next Business Day Warranty

With plenty of power to run all of your desktop and multimedia applications alongside SIMS, our highly responsive Enhanced P2P Server is perfect for users who need more from their SIMS server.

Consider enhancing your desktop experience by adding on one of our high resolution 28" monitors; ideal for desktop publishing and working with multiple applications at once. Please let us know if you would like your quote to include this option.

Optional Services

REMOTE BACKUP OPTIONS

This would also be an excellent opportunity to review your current back up arrangements. Tape drives and external hard drives just don't cut it any more when it comes to protecting your pupil and assessment data. Did you know that BT Lancashire Services offer a robust and hassle free remote back up service?

To find out more about our expandable 'RBUSS' remote backup service please contact your Business Relationship Manager.

RACK MOUNTED SERVER OPTIONS (Domain Servers Only)

Please note that BT Lancashire Services can provide equivalent servers in rack mount form factors, should you require them. Please contact your Business Relationship Manager to discuss.

LICENCING

Please be aware that your new server will need to be properly licenced for your number of users. Our team will work closely with you to ensure that you are supplied with all appropriate licences.

Prices and specifications may vary. Product photos are for illustration purposes only. Please contact us for the latest specification and to request a quote to meet your schools needs

STANDARD SERVERS

Our range of standard servers are built to deliver the performance you need at a competitive price. With options to suit any school, these systems can be configured to manage your admin or curriculum domains, or both for convenient access to shared resources.

Standard Server
Intel Xeon Processor
32GB RAM
3 x 600GB SAS HDDs (RAID5)
Smart UPS
5 Year On Site Next Business Day Warranty

HYPERVISOR SERVERS

Our powerful range of Hypervisor servers represent a high powered and future-proof solution. Capable of consolidating multiple servers on one device, they allow for flexible and dynamic server architecture and maximum security for remote access users. Enjoying all of the advantages of separate servers without the footprint or support costs, these systems are ideal for schools who have an eye on the future.

Hypervisor Server
Intel Xeon Processor
64GB RAM
4 x 600GB SAS HDDs (RAID5)
Smart UPS
5 Year On Site Next Business Day Warranty
