# Introducing Smarter, Simpler Backup for Schools

Remote Data Backup Education Bundle for Servers, Endpoints and Microsoft 365

We now offer a fully inclusive backup service combining key requirements for backing up data. It ensures a comprehensive back-up of on-premise servers, desktops and laptops, PLUS data in your Microsoft 365 tenancy into a simple to request and managed single service subscription.

This service provides the following benefits for schools.

- Save time: Backup all school data held on servers or other devices in school

- Simple management: No more selecting which files are the most important to backup and which can be ignored

- Easy cloud data backup: Backup all school users, Microsoft 365, SharePoint, One Drive and Teams data

- Support your transition to cloud-based services: by helping to ensure that your school's important data stored in the cloud is backed up and retrievable as part of your school's disaster recovery plan

- No limits: Avoid time wasted assessing the importance of data - all data can be backed up (subject to a fair usage policy)

- Simple to purchase: single subscription model based on the pupil count for your school

Our new recommended backup option and our only option which can include backups of data stored in your Microsoft 365 tenancy

- This comprehensive backup ensures that in the event of a complete server loss or hardware failure, or a cyber-attack, that more data is available, to assist recovery from cyber-attack

- No limits on data being backed up from either your school servers, endpoints or your school's Microsoft 365 tenancy

- Helps your school meet advice from the National Cyber Security Centre (NCSC) to ensure you have backups of all essential data
